

Dear resident and anesthesiologist assistant program directors and coordinators,

You and your ASA resident/student members now have [complimentary access to 20 patient safety online courses](#). As stated by Anesthesia Patient Safety Editorial Board Editor-in-Chief Dr. Jane Easdown, “These courses offer your residents and students up-to-date information and many of these topics may appear on their future exams. The content is aligned to ACGME and other training program requirements. Importantly, this patient safety information will put them ahead of the game when they graduate and enter practice.”

Take a look and consider including these courses in your program curriculum. All courses are easily accessible by selecting the desired course from the list and clicking on the “self-enroll” button located in the lower left-hand corner of the screen.

This feature is only accessible if you have an **account with ASA**. If you do not have an account with ASA, you may create one [here](#). Please allow 24 hours for this feature to activate.

Please feel free to email us if you have any questions at educationcenter@asahq.org using the subject line “Complimentary” or contact ASA Member Services at 630-912-2552.

Thank you for your consideration,

ASA Education Team
