

ACE 13A Booklet Instructions

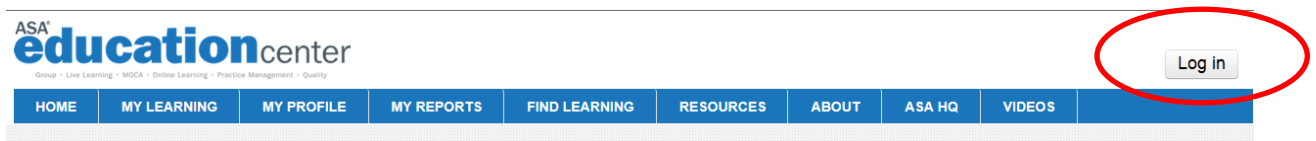

Listed below are instructions to submit your responses, complete the course evaluation and claim your CME credit for **ACE 13A Booklet** version.

1. Go to www.asahq.org.

- Select the **My Learning** button at the top right of the page.

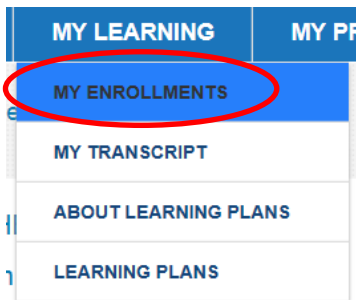

- Select **Log in** at the top of the page.

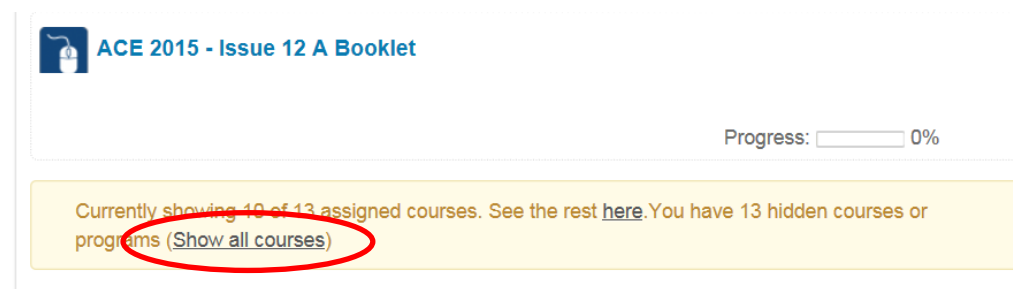

- Enter your **Email Address on file with ASA** and **Password**, and select **Login**.

2. Under the **My Learning** tab at the top of the page select **My Enrollments** from the drop-down menu.

3. Select **ACE 2016 – Issue 13A Booklet** from your list of courses.

NOTE: You may need to Scroll to the bottom of **My Enrollments** section and select **Show all courses** if you do not see your course initially.

4. View the **Welcome** page and proceed to **ACE Questions** to enter your responses.

ACE 2016 - Issue 13A Booklet Your progress

This self-assessment program tests your knowledge of the fundamentals in anesthesia, including subspecialty content tailored to the generalist. The ACE program will keep you current with clinical and professional guidelines, as well as help in meeting your commitment to lifelong learning. ACE is a great learning resource for physician anesthesiologists, anesthesiology residents, researchers and other health care professionals.

ACE Questions

INSTRUCTIONS:

Select an answer for each question. Prior to confirming the submission of the quiz attempt, you may view your question/response status. Please reference your hard copy booklet to view discussions. Once all questions are answered, submit the quiz for a final grade. You will have an unlimited number of activity attempts to reach the passing score of **100%**. Should you need to re-attempt the quiz, your answers from your previous attempt will be saved so you will only need to re-take any incorrect questions.

Once the ACE Questions are successfully completed, there is a brief course evaluation prior to claiming your CME credits.

Expiration date to claim your CME: 05/01/2017.

Should you have any questions please email educationcenter@asahq.org.

- For each question, select the response you think is correct. Complete all 100 questions.

Question 1

Immediately after birth, a neonate is noted to be cyanotic and bradycardic with a heart rate of 50 beats/min. After suctioning the oropharynx, despite positive pressure ventilation with good chest excursion, the neonate still appears cyanotic and has a heart rate of 50 beats/min. According to the American Heart Association's newborn resuscitation algorithm, which of the following interventions is the MOST appropriate next step in management?

Select one:

- A. Repeat suctioning of the airway
- B. Administer epinephrine
- C. Initiate chest compressions
- D. Administer atropine

- Prior to the submission of each quiz attempt, you may view your question/response status. Please reference your hard copy booklet to view discussions.

5. When finished recording your responses, select **Submit all and finish**. *You must meet the passing score of 100% to claim CME credit.*
